A MANDATE NEEDED.

That extra-official body, the "Mayor's Cabinet," disapproves of THE EVENING Workingmen's Lecture bill, on the ground that it is " mandatory," and that " ifficient power already exists in the Board of Education and the Board of Estimate to establish workingmen's lectures."

If this be so, it is evident that a mandate is needed. The power has never been exercised for the benefit of the workingmen, and there is little likelihood that it will be without a directory statute to that effect.

So long as the "Cabinet" approves the plan, why should it object to having it put in operation? We trust that the Governor will sign the bill.

BOGTIS BIDS.

The bogus bid for \$5,000,000 of Government bonds, made with intent to deceive the public as to the amount of money to be disbursed by the Treasury, is another illustration of the danger of a surplus.

It is a shame that the Treasury should be made a partner in Wall street gambling. It is a great injustice to tax this generation to pay premium upon bonds that the sinking fund would take care of.

The remedy for all this trouble and wrong is to stop the surplus by reducing the war

DIVIDENDS VS. DEATH.

The testimony taken by Coroner LEVY yesterday proves that the death dealing electric wires are maintained in a dangerous condiion because it is cheaper to neglect than to protect them.

The wires ere not buried, they do not have the best insulation, safeguards are not provided nor dead wires removed, "because the companies cannot afford it."

In other words, it is the old contest of div idends against death, and the dividends win through the spathy of the public or the neglect of officials. A few round verdicts egainst the companies for killing people would make it for their interest to be careful.

But the wires should go under ground.

STABS IN THE DARK.

The discovery that a jealous wife, assisted by her servant, wrote the anonymous letters gainst the accused school-teacher, Miss Mason, and that the main charge against ber has been proved to be false, shows the danger of entertaining unsupported accusations.

An anonymous letter is a stab from the darkness. It is always cowardly and usually maliciously false or the creation of a disordered imagination. The fit place for it is the fire. A needless and cruel public scandal like

this hurts the schools more than any single case of secret wrong-doing could possibly do.

Senator Blazz's bill to stop the carrying of mails on Sunday, and to put a stop to everything but psalm-singing and sleeping on the first day of the week, is simply another exhibition of the New Hampshire crank's crankinees. The hands on "time's dial' cannot be turned back two hundred years by act of Congress.

THE WORLD'S Mr. CRAWFORD, who knows Mr. BLAINE, says that the people who think the Maine statesman is shamming, and really means to run, don't know him. if this be true, the great body of Mr. BLAINE's friends and admirers in this country are surely in profound ignorance of his character and

WORLDLINGS.

The oldest pensioner on the rolls of the United States Pension Office is John Batchelder, the dependent father of Samuel Batchelder, late of Company D. Fifty-third Illinois Infantry. He is 108 years of age.

Joseph Haddon, of Liverpool, S. C., is probably the oldest engineer, in point of service, at least, in the United States. He has held a throttle since 1888, and in his youth was an apprentice of Robert Stevenson, at Newcastle-on-the-Type.

The floor of an old building occupied as a saloon in Woohsocket, R. I., was taken up recently and eight bottles of fine old whiskey were discovered. The bottles were covered with mould and gave every appearance of having lain there for years.

(WRITTEN EXPRESSLY FOR THE EVENING WORLD.

T another fire, where there was not so disastrous a calamity attending the efforts of the men, the recognition of their laboration of their laboration. tion of their labora was far more satisfactory. At that time I was on Hook and Ladder Truck No. 8. The full company was a man was absent on

round dozen. But one man was absent on account of sickness; another because it was his " day off," and a third for some reason which I do not now remember.

The nine who were at the fire were all enrolled on the "Roll of Merit," the book at Headquarters where official recognition of praiseworthy conduct on the part of the members of the department is put down in black and white. It is the only instance, I believe, where an entire company has been inscribed on its pages.

The fire was in a four-story tenement house on Beach street and West Broadway. The smoke was something terrible. The ladders were run up against the building and sixteep persons-men, women and children-were safely removed. No one secured the Bennett Medal because "personal risk" is a condition for that, and on this occasion the firemen were not exposed to any special danger.

CAUGHT BETWEEN THE LADDER AND WINDOW The ladder came into play well. Every truck carries about nine. These fire-ladders are of different lengths, so as to suit different heights. Although the ladders are raised at a pretty sharp angle, one that is resting on the upper story cannot very well be utilized for the rescue of people on the lower stories. But there are a variety of lengths, and the judgment of a chief is needed to tell which is the most suited for different heights.

Everything at a fire has to be done expediionsly, and there is no time to try experiments. You do not want to try ladders till one suits. They are of the following different lengths in feet: Twelve, 15, 20, 25, 30, 35, 40, 42 and 45. Then come the extension ladders, which are 50 feet, 65 feet, 70 feet and 85 feet in length.

The last is on the Haves truck, and only three hook and ladder trucks have them, namely, Nos. 3, 12 and 16. It is fastened to the truck and is wound up into position, and then can be turned in any direction. Five or six men can work it, and probably it doesn't take more than a minute and a half to get it up.

Story of a Tramp Arrested on States Island for Burglary. Michael Foley, aged thirty-four, who

claims to be the outcast son of John Foley. the gold pen manufacturer, of this city, was arrested at Stapleton, S. I., last night on a charge of burglary.

Foley first visited Staten Island last fall, since which time he has led the life of a tramp. During the winter months he lived in the cabin of a yacht that was hauled out on the Stapleton Flats. He succeeded in main taining himself by "rushing" the free-lunch counters in the saloons of Stapleton. He has served several terms in the Rich-

mond County Jail for being drunk and dis orderly. Foley says that his father discarded him for marrying against his wishes.

A TERRIBLE EARTHQUAKE PREDICTED FOR NEW YORK.

PREDICTED FOR NEW YORK.

It is beyond peradventure. It is certain that within the next ten days facts will be given to the public which will startle them more than they have ever oeen startled before, and is likely to create the most profound sensation of modern times. As soon as the truth gets to the public the ver-table panic created will (comparatively speaking) amount to an earthquake. As a matter of course, within the fory-cight hours following the publication people will recover and partially resume their daily avocations. It is the first spock which may prove fatal to many, and in order to lessen its severity upon the timorous and weak, we briefly and in only general terms indicate the character of the startling revelation.

starting revelation.

It has long 'een secretly known that twenty barreis of Spanish doubloons were conveyed from a ship in North Eurer in 1625 by Gonzales De Velgolet and his piratical companions, who murdered the captain and drew of the frigate Aretino, and in the and his piratical companions, who indirected the captain and crew of the frigate Arcilino, and in the dead of a stormy night carried their stolen booty ashore and deposited it in the ground of Manhattan Island. Certain incontrovertible facts have recently developed to prove that the spot is that now occupied by the Fourteenth Street Toeatre, and that the twenty burrels of doubloons are at this moment buried deep in the earth immediately beneath its walls. A reporter celled upon the manager of the theatre lass hight, and in answer to his inquiry as to when a procable exhumation would be made, received the following astonishing answer. BEST-KNOWN CITY BARBERS.

Career of Fred Ebeling, Who Used to Shave President Lincoln.

Barber Fred Ebeling, who presides over affairs of the razor and shears at the St. Denis Hotel, has been a great traveller in his time, although for the . past eighteen years he has been settled quietly in his com fortable little shop at Broadway and Eleventh street. Mr. Ebe-

in Wall street, near William.

He remained there four years, when he had an opportunity of going to Washington with a friend who proposed to open a tonsorial establishment there for the benefit of the Prestablishment ident's Cabinet and the members of Con-gress. During his three years' stay there, from 1862 to 1885, Mr. Ebeling naturally came into contact with many of the most em-inent figures in national politics of that day. He irequently dallied with his razor over the shrunken cheeks of President Lincoln, who was always a very quiet and passive who was always a very quiet and passive subject. Masso's home, ready to go to work. Masso told them that he had received a telegram which necessitated a postponement of their

departure.

Suspicion was aroused, and the men demanded the return of their money. Masso refused to entertain any such idea, and the crowd talked of hanging him to a convenient lamppost. They had him arrested instead.

Masso was held.

DR. B. HOFMEISTER

Read Before the Medical Society of London a Paper on the Use of "CARLSBAD WATER," of Which the Following Is an In speaking of those diseases in which the use of Carlsbad Water is indicated I will confine myself to those in which evidence is given for thoroughly

established usefulness.

First are to be mentioned diseases of the stom ach, among them and above all the true Chronic Catarrhal Inflammation, with substantial changes of the mucous membrane, with ulceration and gathering of stringy and often somewhat offensive

The unnatural motions of the stomach causing pressure and belchings, the irritations of the intestines resulting in catarrh of the bowels, and the inflamed mucous membranes are the most fruitful of all known causes of disease. Out of them grow most kidney and liver troubles, diabetes, all rheumatic affections and gout. I have found that the unnatural motions of the stomach cease, the intestinal troubles become soothed, and health results from the use of Carisbad Water. The diurette effeot of this water, its quiet action upon the lining of the stomach, and its healing power upon the inflamed intestines are beyond all praise.

GOUT is well recognized as arising from excess of uric sold in the blood. This theory is supported by the FAVORABLE ACTION of the Carlsbad Waters. Dr. Lustie, of Teplitz, issued a pamphlet wherein he recognized the great efficacy of Carisbad Waters in RHEUMATISM, both acute and chronic, when taken COLD. Carisbad Water is in no sense a mere purgative,

as most people believe, but is an alterative and diminative remedy, which dissolves out tenacious bite, allays irritation and removes obstruction BY AIDING NATURE, and not by sudden and excessive stimulants as most cathartic remedies do Its action is certain and a cure when effected is permanent. Not infrequently patients have to use the Sprudel Sait, in addition to the water, as a

Experts With Hook and Line Who West Down to Mandy Hook Against the Finny Tribe—Bill Price Towed by a Skate— Tom Fair Nearly Caught an Eagle—Eda,

The somewhat clearer weather of Sunday enticed a goodly number of fishermen to try their luck. Those who went with Capt. Foster's excursion brought back large messes," On Ed Houston's excursion to Sandy Hook there was the usual crowd of old-time protessional fishermen, with their

families. Here are some of their names, with what they say they caught:

James Connors, 10 blackfish and 12 flounders.
Francis Bowman, 16 blackfish and 14 flounders.

A Boy's Miraculous Escape.

John Quigley, a fifteen-year-old urchin, was struck by a drill engine in the Pennsylvania Railroad yard while picking coal last evening and pitched fully twenty feet forward on the track. The engineer put on brakes and drew up with his engine covering his little form. When he hastened to pick up what he supposed must be the boy's corpse he met the uronic crawling between the wheels and crying: ''Jist keep her still 'till I get me coal." Hobbiling to his bag lying near, he threw it over his shoulder and trudged home, little the worse for wear.
